D-SCOPE® SYSTEMS VIA

As leaders in endoscopy recording and archiving solutions, D-Scope continues to evolve with new features designed to improve your clinical workflows, enhance patient care, and seamlessly integrate with the latest healthcare technologies. Come by our booth and discover how our new partnerships and platform updates are bringing AI-driven capabilities, advanced reporting, and complete operating room (OR) integration to the forefront of our medical media solutions. Let's explore the benefits D-Scope VIA brings to your healthcare organization.

D-Scope VIA Capabilities Expand with Caresyntax Technology

D-Scope Systems is pleased to continue and expand our strategic partnership with Caresyntax, a leader in surgical automation and data-driven healthcare solutions. This collaboration enhances D-Scope VIA's ability to provide advanced features that improve patient outcomes, operational efficiencies, and clinical decision-making.

Caresyntax is renowned for its OR integration and data-driven insights that enhance safety and efficiency. With our partnership, D-Scope VIA users can now benefit from real-time, AI-powered analytics that improve workflow and provide robust, automated reporting capabilities.

John Bradley, Vice President Strategic Partnerships at Caresyntax notes: "Caresyntax is proud to partner with D-Scope® Systems, a leader in medical media solutions for over two decades. Their innovative platform, which includes secure capture, storage, and EHR integration, is trusted by top institutions and federal healthcare systems. Their commitment to advancing telemedicine and improving patient care through cutting-edge technology makes them an invaluable partner in the healthcare industry."

Our partnership also allows for complete operating room integration, ensuring that D-Scope VIA can seamlessly connect with surgical devices, cameras, and other technologies to provide a unified, efficient workflow. The enhanced AI-driven features will help surgeons and healthcare teams make better, faster decisions with access to real-time data and intelligent insights.
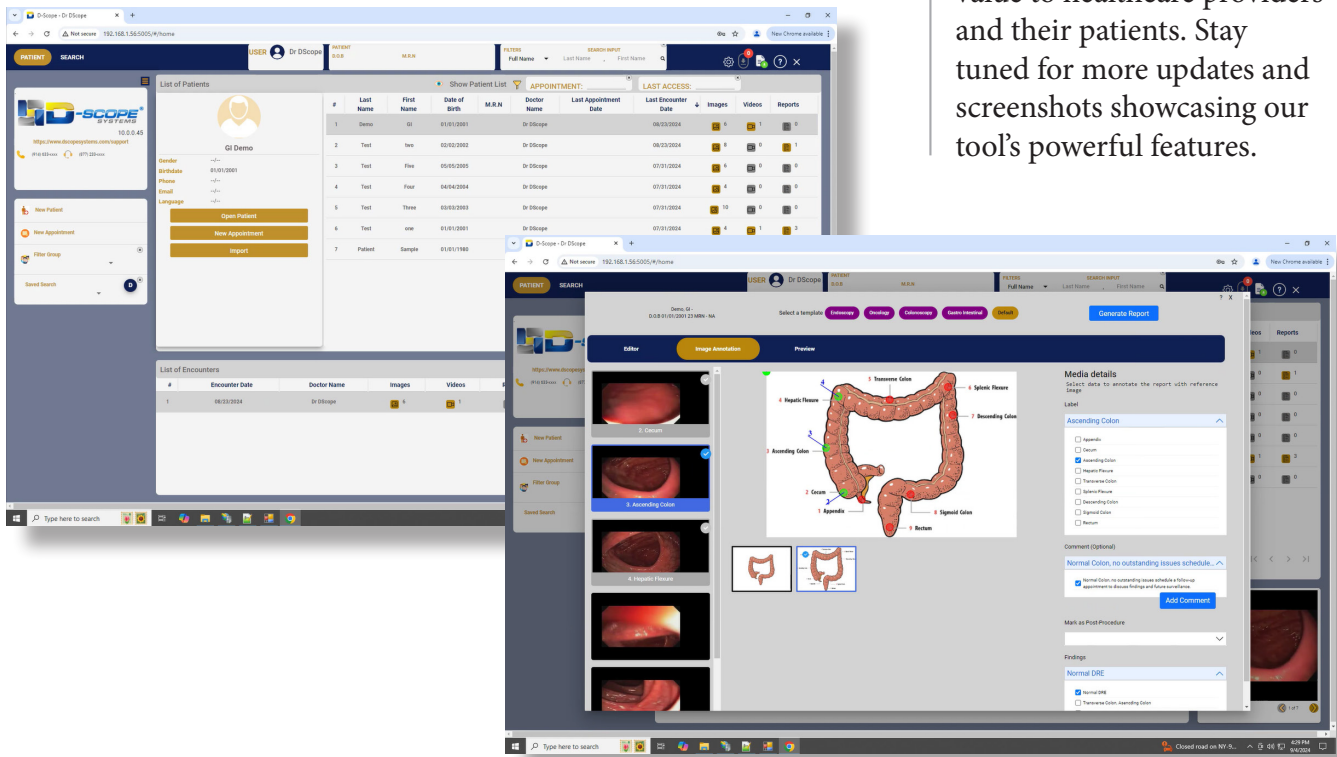

Advanced Reporting Enhances the D-Scope VIA Experience

D-Scope VIA and Caresyntax are collaborating on an innovative reporting tool that will take post-surgery analysis to the next level. This advanced reporting feature is designed to generate detailed, customizable reports that can be tailored to the specific needs of various medical specialties and procedures. By integrating real-time data and high-resolution visuals, our tool will offer surgeons and medical teams a more comprehensive understanding of surgical outcomes.

One of the key benefits of our new tool is the ability to produce higher-quality post-surgery reports immediately, allowing for quicker analysis and documentation. The enhanced visual resolution will provide clearer images and video stills, while the data-driven insights will offer deeper analysis of surgical performance and patient outcomes. Our tool is highly flexible, allowing users to adjust the format and content of the reports to suit individual preferences and procedural requirements.

Currently in the final stages of development, we plan to enter beta testing this year. Early feedback from testers will help fine-tune our tool's capabilities before its wider release, ensuring that it delivers maximum value to healthcare providers and their patients. Stay tuned for more updates and screenshots showcasing our tool's powerful features.

Caresyntax Prime Will Power
New D-Scope VIA Complete OR Integration

D-Scope VIA is expanding its capabilities through our collaboration with Caresyntax to deliver total on-premise OR integration. Powered by Caresyntax Prime, this new integration will extend D-Scope VIA's functionality beyond endoscopy recording and archiving. Surgeons and medical staff will have seamless access to real-time data, device connectivity, and comprehensive visual and audio feeds, all within a fully integrated OR ecosystem.

Our enhanced integration will provide a unified platform that connects D-Scope VIA with other critical OR technologies, improving workflow efficiency and enhancing decision-making during surgeries. With Caresyntax Prime driving these advancements, the D-Scope VIA platform will support a more cohesive and data-driven surgical environment, ensuring that healthcare teams can operate with greater precision and coordination. Another update will be coming soon.

D-Scope Military Server Integrates DICOM Modality

D-Scope is proud to announce the integration of DICOM Modality with our server system, a development that significantly enhances functionality for the Defense Health Agency and the US Department of Defense's IVISS medical recording system. This integration allows non-D-Scope modality workstations to seamlessly connect to D-Scope Servers, improving interoperability and streamlining medical data management across various platforms.

By incorporating the DICOM Modality, D-Scope ensures that medical teams can access and manage patient data from a wide range of imaging devices, regardless of the system from which they originate. This advancement strengthens the IVISS system's ability to capture, store, and archive essential medical information, promoting better coordination and efficiency in military healthcare environments.

How D-Scope Clients Streamline Tech Response

D-Scope is committed to providing exceptional support for our clients, and our Client Support Portal is designed to enhance the speed and efficiency of technical assistance. Through our portal, you can quickly create service tickets, ensuring that any issues or concerns are immediately logged and addressed by the D-Scope tech support team. This streamlined process allows for faster response times and better issue resolution, reducing downtime and improving overall satisfaction.

Our portal also enables direct interaction between clients and tech support team members, ensuring clear communication and more personalized service. Whether it's troubleshooting, requesting updates, or seeking guidance on D-Scope VIA features, our Client Support Portal offers an easy, accessible way for you to receive the help you need, when you need it. We encourage all of our clients to take advantage of this valuable resource by visiting *dscopevia.com* and clicking the "Support Log in" button.

Coming Soon: D-Scope VIA 'Software Only' Packages

D-Scope is excited to announce the upcoming release of our new software-only packages for the D-Scope VIA platform, set to launch in 2025. These packages are designed to offer cost-effective solutions for clients who wish to continue using existing hardware, provided it meets D-Scope specifications. This flexible option allows medical facilities to upgrade their recording and archiving capabilities without the need for costly new equipment purchases, providing significant savings and enhanced operational efficiency.

The software-only packages will include comprehensive licensing and tech support agreements, ensuring that clients have access to ongoing updates and dedicated assistance as they transition to or continue using the D-Scope VIA platform. Clients can also choose to purchase hardware from their traditional suppliers if needed, giving them complete control over their equipment investments while still benefiting from D-Scope's innovative software. Stay tuned for more information as we approach the official launch.
